

# Status Report

#### Your name

Isaac Collazo

#### Your section leader's name

Brian Li

#### Project title

Blind-Sweeper

\*\*\*

Short answers for the below questions suffice. If you want to alter your plan for your project (and obtain approval for the same), be sure to email your section leader directly!

#### What have you done for your project so far?

Learned basic tools for Java, downloaded a really good IDE called Eclipse... Its been a very valuable resource for me thus far. I've set up the basic elements of the game... The screen, the tile map, etc, etc...

#### What have you not done for your project yet?

Imported Sprites

Mouse interaction for each tile

Sound byte for tiles to detect bombs in a 9x9 radius

pretty much the only bits of the project that are interactable in some way.

#### What problems, if any, have you encountered?

Figuring out Java and all of its unfortunate Syntax... Even following along with a tutorial is somehow taking way longer than expected
